Front-End : AngularJS, jQuery, Twitter Bootstrap

Back-End : Node.JS, ExpressJS, MongoDB, XAMPP

Tools   : Git / GitHub, Yeoman, Grunt, Bower, NPM, Adobe Photoshop

Languages - English, Chinese

Projects

E-Store

Used AngularJS as client-side MVC framework for SPA, and worked
with Parse(core) web service as server-side with RESTful interface.
Created item catalog with filter, shopping cart feature, and
checkout where form is validated and order saved in back-end database.
Created interface for Admins logins, where item catalog and customer
orders can be examined and modified in sync with the back-end database.

Google Map Web Application

Developed with Google Map API and jQuery, with Node.js as server.
Integrated local GeoJSON data with Google Map Places for full search.

E-commerce

Created using PHP with XAMPP stack as server-side environment.
Implemented user accounts, forums, and used Paypal as payment processor.
